

THE SUITABLE SYSTEMS FOR YOUR PRODUCTS

CPS®RFID for maximum supply security

RFID is a perfect system for managing the replenishment of production material and is a key building block within an efficient value chain. Within the industrial Kanban systems, Würth Aerospace Solutions has been utilising this technology to apply lean management for the inventories, automatically map the reorders and identify any fluctuations in demand at an early stage. As a result, the systems from CPS®RFID family contribute to an even higher supply security compared to conventional Kanban processes.

Vending machines

With vending machine solutions, Würth Aerospace Solutions offers a holistic concept for auxiliary and operating materials – from delivery, storage and stocking to fully-automated replenishment. Würth Aerospace Solutions helps the customers to achieve a productive material management with vending machines. The modular structure of the systems offers high flexibility for automated, transparent availability of inventories anytime.

REFILLO®mat – Reusable system Refilling instead of discarding.

Is the customer using different aerosol cans in production and is searching for a system for automatically refilling spray cans? Würth Aerospace Solutions has the perfect solutions for the customer. REFILLO®mat, the safe and economical system for automatically refilling the spray cans with active substances and compressed air.

WÜRTH Aerospace Solutions

C-PARTS SOLUTIONS FOR AEROSPACE INDUSTRY

About us

Our main priority is to create solutions which contribute to higher flight safety and resource efficiency in aerospace. Würth Aerospace Solutions GmbH was founded in January 2020 in Bad Mergentheim and offers C-Parts solutions for aerospace, fasteners as well as auxiliary and operating materials. As a service provider for logistical supply concepts, Würth Aerospace Solutions is certified according to DIN EN.

ALL FROM ONE SINGLE SOURCE!

WHAT WE OFFER

Supply security

comprehensive, competent and optimum C-Parts supply.

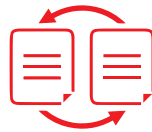

System optimisation

Customised system solutions.

Automation

Automation in operation, also in C-Parts supply.

Strong partnership

We are your stable business partner: "Grow with & with the help of WÜRTH".

Process optimisation

Seamless supply and process chain at the highest quality level.

Innovation capability

Innovative supply and logistics systems for aerospace division Aerospace industry.

Prompt availability

In addition to order details, you will find information about more than 1,100,000 products and our service offers – 7 days a week, 24 hours a day, in Würth Online Shop.

Specialised range of C-Parts

Comprehensive product portfolio of fasteners, items according to standard as well as MRO for the entire product lifecycle.
